we got a hit on him finnally !!
HA! how's that ?!

you think you can survive another one of my Meteor Impacts do you?
tch. what's with that 'im so amused' face. huh?
it's been years since i was put into a battle like this one
that really was something
for this i give you my admiration
I presume you're not using the power of 'Evolution'
Do you think that power could defeat me?
not including the fact it was rushed and unoffical it gave you enough power to defeat milleniumon
the hell? how do they even know about that?
there's no point in hiding it
... Taiki ....
Tactimon! do you know anything about it?
the Bagra Army has an interest in this power don't they?
HAHAHAHA! as if we should waste that power on you !!
Heheh
that and we're not even sure how to use that power!

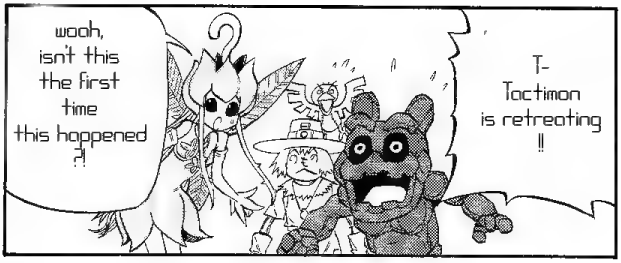
oh and do be carefull. i dont want anyone killing you besides myself
heh i see
Well Kudou Taiki till we meet again

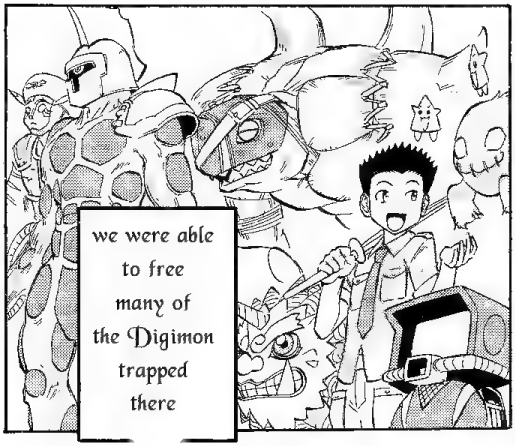


wooh, isn't this the first time this happened ?!
T- Tactimon is retreating !!

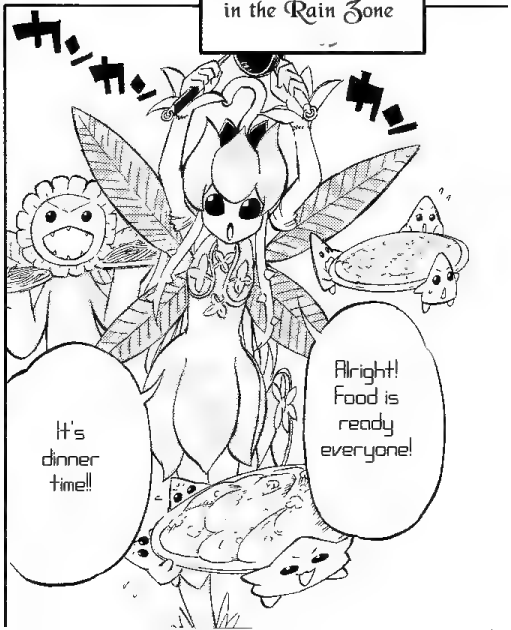
hm...
I feel like this battle has happened before

Tch. cowards. running away from us!
well a win is a win

It's been a few months since that fierce battle with DarkKnightmon in the Rain Zone



we were able to free many of the Digimon trapped there

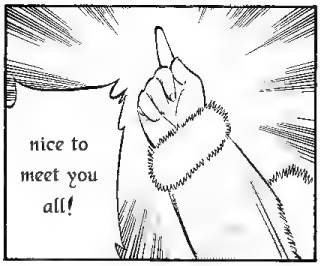


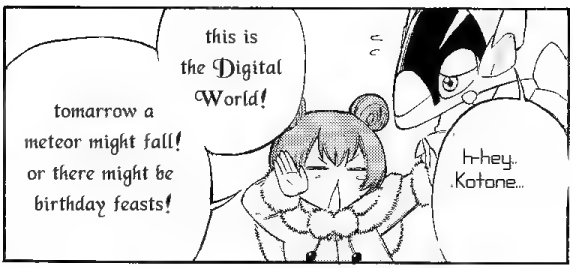
They even wanted to help us and joined our army, as well as Kiriha's army too
Now not only have we become a small legend but we've become a real hope for the Digital World

Thanks Gotsumon Elder!
with the combined hopes of the Digital World!

we really might be able to defeat Bagramon now!
and would like to aid you the best we can
In return we want to give you our Code Crown!
Thank you for saving us!

DarkKnightmon whom did escape is probably plotting against us
and then there's Nene... who fused herself with Shademon to protect us...
and Taiki's 'I cant ignore them!' continues...
Although we somehow managed to drive milleniumon into another demention in the Digital space
our goal still is to save what remains of this world... and those who got involved
poe?
kotone! do you reconize me?!
oh yea
Kotone! can you hear me?!
hn..?
ahhh sparrow-mon-shan!
is it morning already?
after that battle we finnally rescued Nene's sister, Kotone. though her personality surprised us

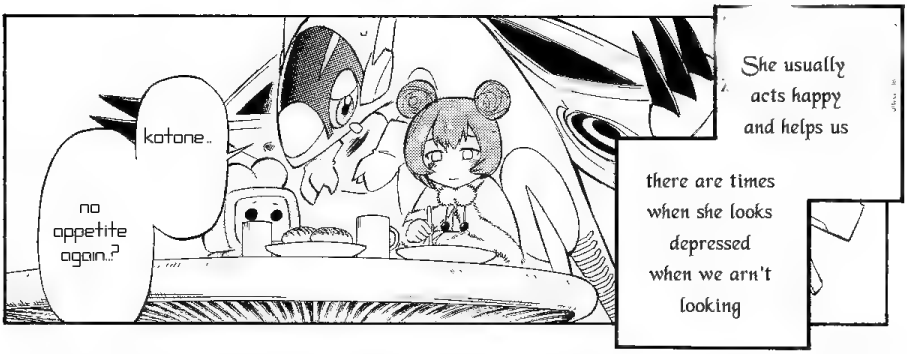




* she is 10 years old, if you dont get the joke o3o

ばんばん
hey! you're supposed to laugh!
dont you guys know jokes!
ハッハー!!
even though a large amount of Xros code was taken from her
she seems like she's in good health and spirits

though it was hard for kotone to accept
i wonder if it should be called stubborness or not in the end her final wish was granted...
we had to tell her...
Sooo! Where is sister?
do you know where she is?



kotone..
no appetite again..?
She usually acts happy and helps us
there are times when she looks depressed when we arn't looking

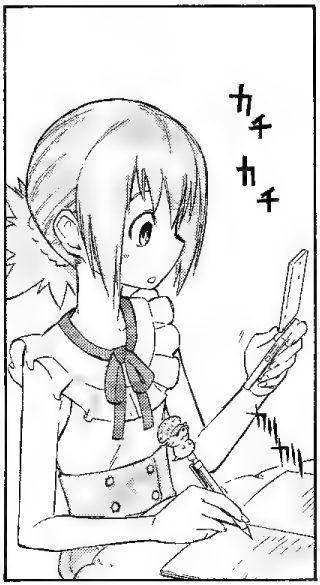
for things like this!
the special crepe that Nene would buy from a shop in Sweets zone!
just for you!
you can't grow into a fine lady if you dont eat!
that's not good! not at all!
!?

sounds like something a guy who is bad with women would do
hmph! trying to make me happy to get in good with sister
hah?!
Hey, ive heard some rumors about it though seeing it myself is something
?
i was trying to be nice!
y-you!
you uncute brat!
this is my first time seeing this army all together!
even though they've traveled the digital world
look!
and somehow they dont manage to run out of food

きのこラーメン・きのこギョウザ

you know, you seem to talk about your thoughts aloud often. wizardmon
but didn't we come here to talk to kudou Taiki about something important?
ah yes you're right
we should get to that soon
Also it seems like Blueflare currently in Factory Zone has equal level of attack power
although it is said that the end of the war will come sooner if they team up with us
though neither general wants to team up yet

ugh..
good.. work... Akari...
ahhh!
finally this month's food and medical supplies are all taken care of!



カチ カチ

he keeps working till he faints..
sigh..
すか——

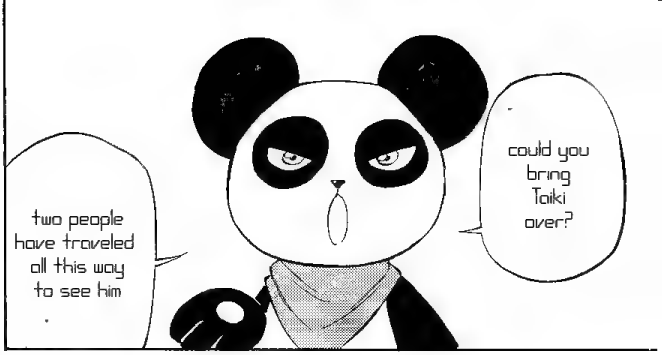
ぼふ〜ん
hoi!
you as well

looks like i'll have to make you some new clothes

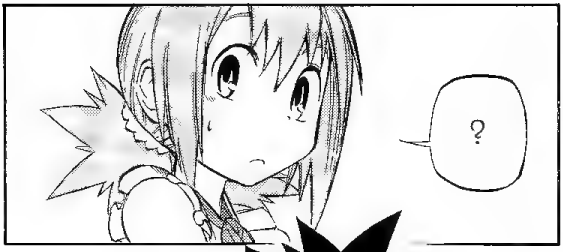
your jacket is full of holes..
geez. look at you

ever since that incident..
you've been overworking to
fullfil other people's dreams...
don't you think it's
a bit much..
ah
so
that's
..
this zone's
code
crown...
according to
what Nene,
said..
we might be able
to go home with
these..
see...
Akari
!!
ah,
yes?
i wonder if
our world is
alright..
あって
Even though
a lot has
already
happened
till now

hey! sorry to keep you waiting!

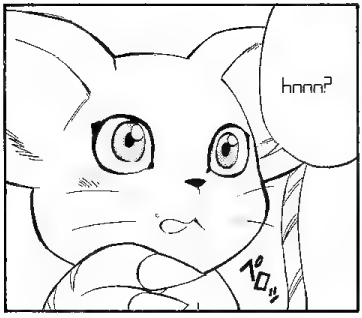


could you bring Taiki over?
two people have traveled all this way to see him



?

if it's not to much please listen to us
we are sorry to come on short notice
ほわわわん
oh...



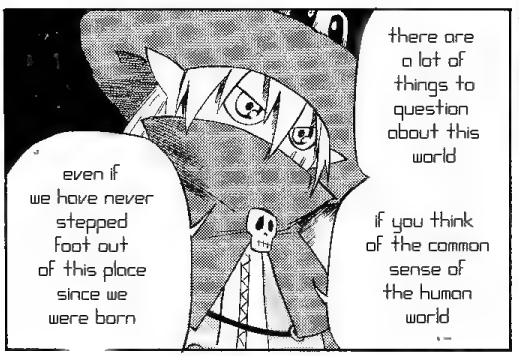
hnnn?

i just got up from a nap eheh
you two are the ones who came to see me, right?

I am Wizardmon
that is my dear friend, Tailmon
i am a scholar. right now we are traveling this world researching it's connections to your world, the human world
that's rude Tailmon
this guy. he doesn't seem like a general..
i get this a lot
it's fine
nice to meetcha mya!
than an assistant.
Tailmon is also more like a bodygourd
the human world!?
let me borrow the powers of the Xros Loader and Code Crowns and allow us to visit the human world!
now what i come here for is to request something of you!

a world where magic and psychic powers are normal

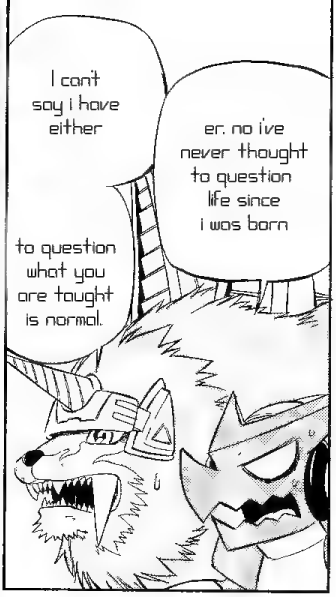
where residents of this world are able to speak when born
or even living things that don't have a form but possess a will?



even if we have never stepped foot out of this place since we were born
there are a lot of things to question about this world
if you think of the common sense of the human world

For many years i have been questioning this world's connection to the human world
you humans, how do you view this world?

though wouldn't it be the same if this was just some well-made Virtual Reality game?
I sort of get it..
? ? ?



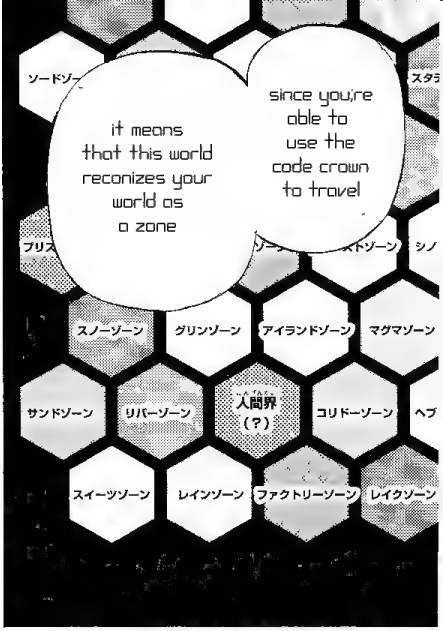
I can't say I have either
er. no i've never thought to question life since i was born
to question what you are taught is normal.

a game like this possibly?
someone out there wanted to create
or rather that it's intentional?

i doubt there are any computers that can process the large ammounts of data in this world
however
if that is the case, a computer would be needed to process the game

Hmm A virtual reality game? that's an interesting thought
one I hadn't thought of

so even if all of the processing data in your world were to be used it's still not enough to make this world able to be a game
it is very possible that the Digital world is part of your own world and thus exists parrell to it
hey, even i don't understand him sometimes
he can go on and on bout this you know
he's speaking too smartly



it means that this world reconizes your world as a zone
since you're able to use the code crown to travel
スノーゾーン
グリンゾーン
アイランドゾーン
マグマゾーン
サンドゾーン
リバーゾーン
人間界(?)
コリドーゾーン
スイーツゾーン
レインゾーン
ファクトリーゾーン
レイクゾーン

i was thinking that this world might have a hidden meaning behind it
one that can be found in the human world
so what are you intending to do when we get to the human world?

so no matter what i want to go there!
i have to investiage it at least once!
it's a wonderous opportunity!

there is no doubt that this world has strong unfluences from the human world!
it wouldnt make sense otherwise!

Kotone !
I'll stay here then!
どん!
i see.. I did think of going back there at least once to visit..
But what about Bagra!?
we'd be defenseless without our general Taiki!
I'm not going anywhere without big sister!
no way! Kotone you should return to the human world before us!
But we can't just leave her alone here!
so Kotone would be alright by herself I think anyway
All of Xros Heart would be here anyway
I won't be able to face Nene if I don't keep an eye on Kotone!
ごごご
the two of you will be fine going on your own!
eh? you sure?
I'll stay here too then
No problem.

i really hadn't thought that my world could hold the key to ending this war
I think we shall head there and have a look
I wonder what this world's secret is...
Oww ow ow ow ow !!!
What are you gonna do?
Hey if you're going take me too!!
It's true.. there is a lot we don't know about this world.. maybe by doing this we can find out more
yeah

ha
ha
ha
hmph. useless. i can't seperate them still
The forced DigiXros and Nene's will refuses to allow the two to seperate

限界か…
that's enough. release the bindings
knight... mon....
dar... dark..
oh
i can't go past my limits like this!
this is not good at all
how annoying because of nene shademon will die if i torture her
my plans are foiled for now
Nene might take control and hinder my plans once more
Fusing myself with BlueFlare's or XrosHeart's digimon would be good... but...

Did they get the code crown to go there?
it is natural they would want to check up on their own world i presume
the human world?
hmmm
★黒騎士の奸計とは…
yes my lord
I have a job for you
i think this might work into our favor
It seems as if their heading to the human world
bringing some digimon with them too
oh is that so, Tuwarmon ?
my lord Xros Heart is up to something
